PROOFPOINT ESSENTIALS

SECURITY AWARNESS SERVICES

WHAT'S INSIDE:

PROOFPOINT ESSENTIALS SECURITY AWARNESS

OVERVIEW

Proofpoint Essentials—Security Awareness helps SMBs deliver the right training to the right people at the right time.

More than 90% of todayís cyberattacks target users through email. While technology safeguards are essential, they canít stop everything—that ís why you need educated employees as a solid last line of defense. Your end-users must be able to recognize and reject phishing, business email compromise (BEC), and other threats. An effective security awareness training program shows your people how to avoid opening the door to a threat.

Proofpoint Essentials Security Awareness is designed to meet this need. Their approach helps efficiently change employee behavior. This design reduces your organization's exposure to breaches while minimizing employee downtime.

PROTECT YOUR ORGANIZATION WITH THREATSIM PHISHING SIMULATIONS

Delivering the training your users actually need is the key to a security awareness program that works. Our ThreatSim® Phishing Simulations reveal how susceptible your users are to a wide range of phishing and spear-phishing attacks. With thousands of different templates across 13 categories, you can assess users on multiple threat types, including:

- Malicious attachments

- Unsafe URLs

- Requests for personal data

KEY BENEFITS

- Reduce successful phishing attacks and malware infections by up to 90%
- Change user behavior
- Provide consistent training designed for SMBs
- Track results and progress witheasy-to-digest reporting
